How To: CAD 1 (BASICS)

Welcome!

What You're in For:

- > What is CAD? Options?
- > Setting Up / Tips & Tricks
- > Demo: How Does It Work
- > Demo: Motor Mount

What is CAD? Options?

CAD = Computer Aided Design

> Lets us design without using materials

> Options (Green = Free):

DOWNLOADED:

> Solidworks

> Autodesk Inventor

> Autodesk Fusion 360

> SketchUp

ONLINE:

> OnShape

> Autodesk TinkerCAD

> SelfCAD

Setting Up / Tips & Tricks

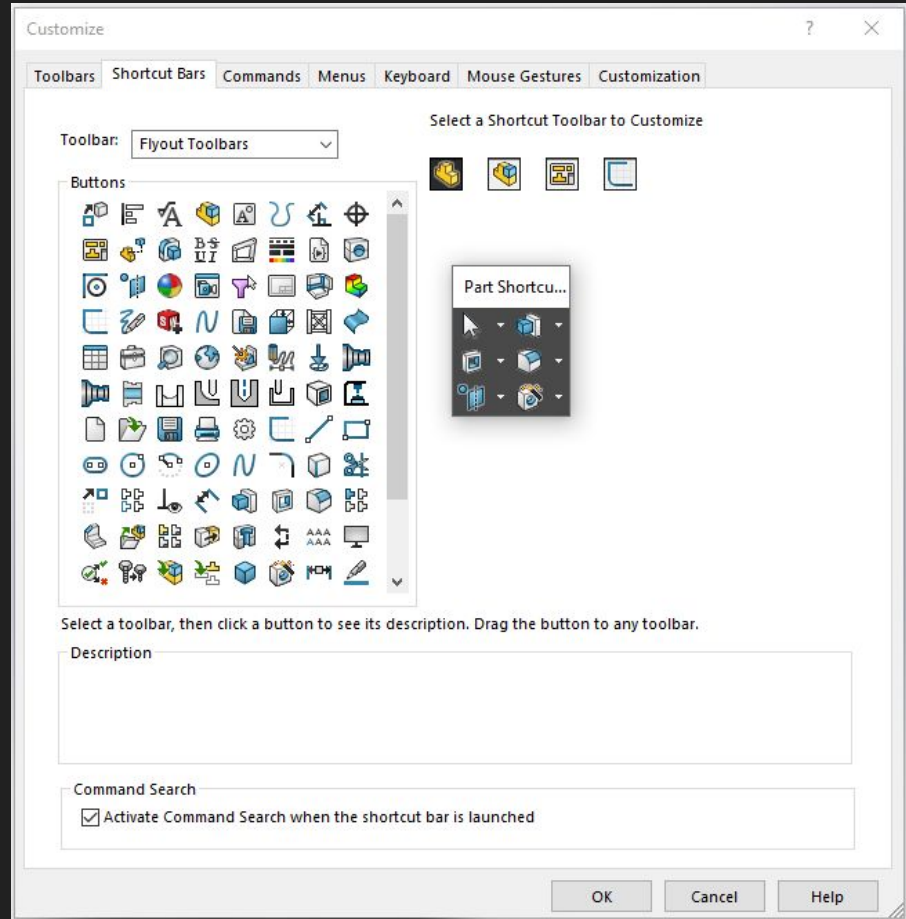

Just some basics to make life easier

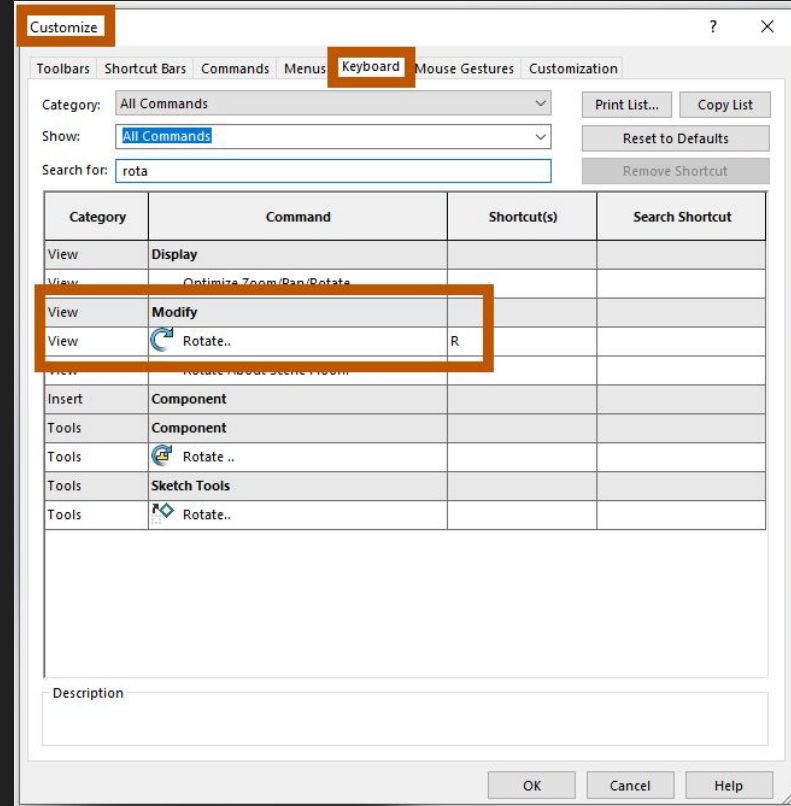

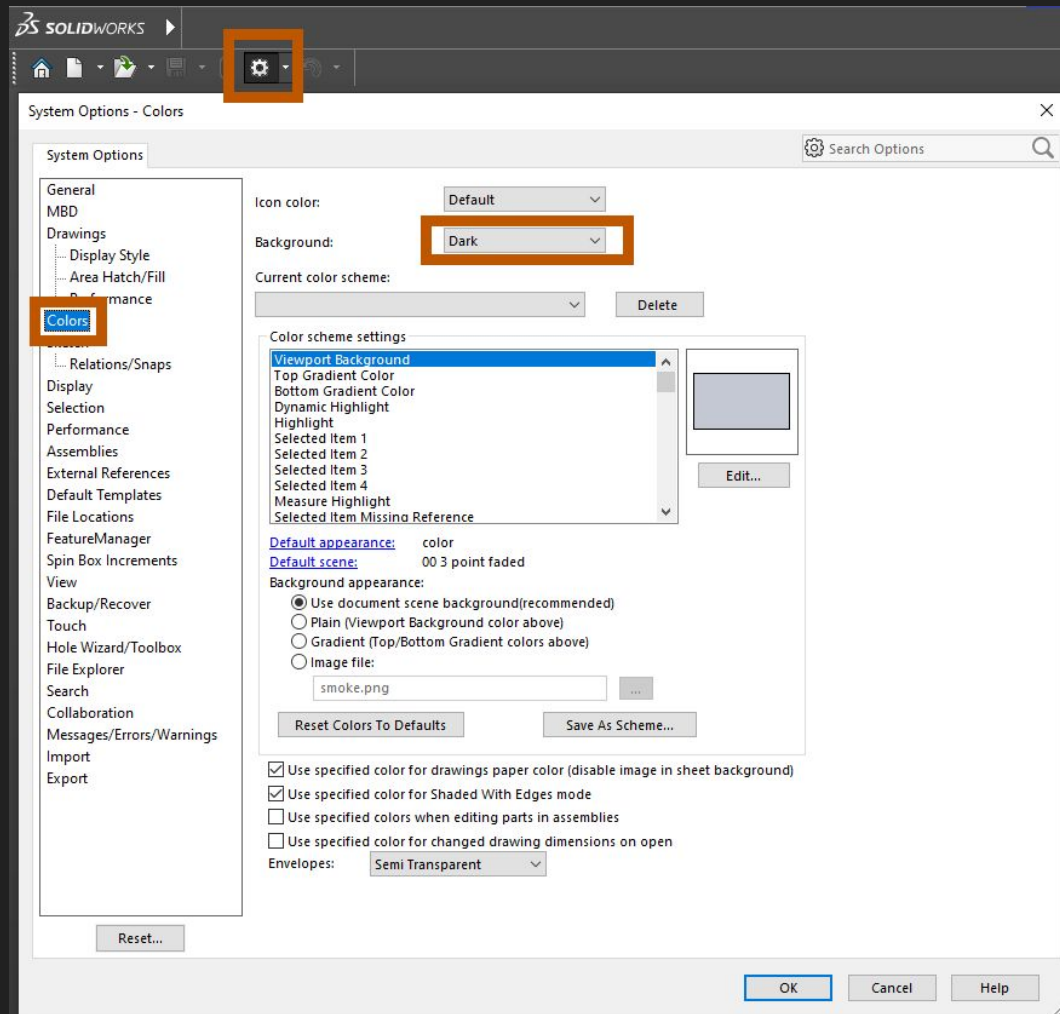

> Light/Dark UI

> Tools on UI

> Tools > Customize

> Bind Rotation

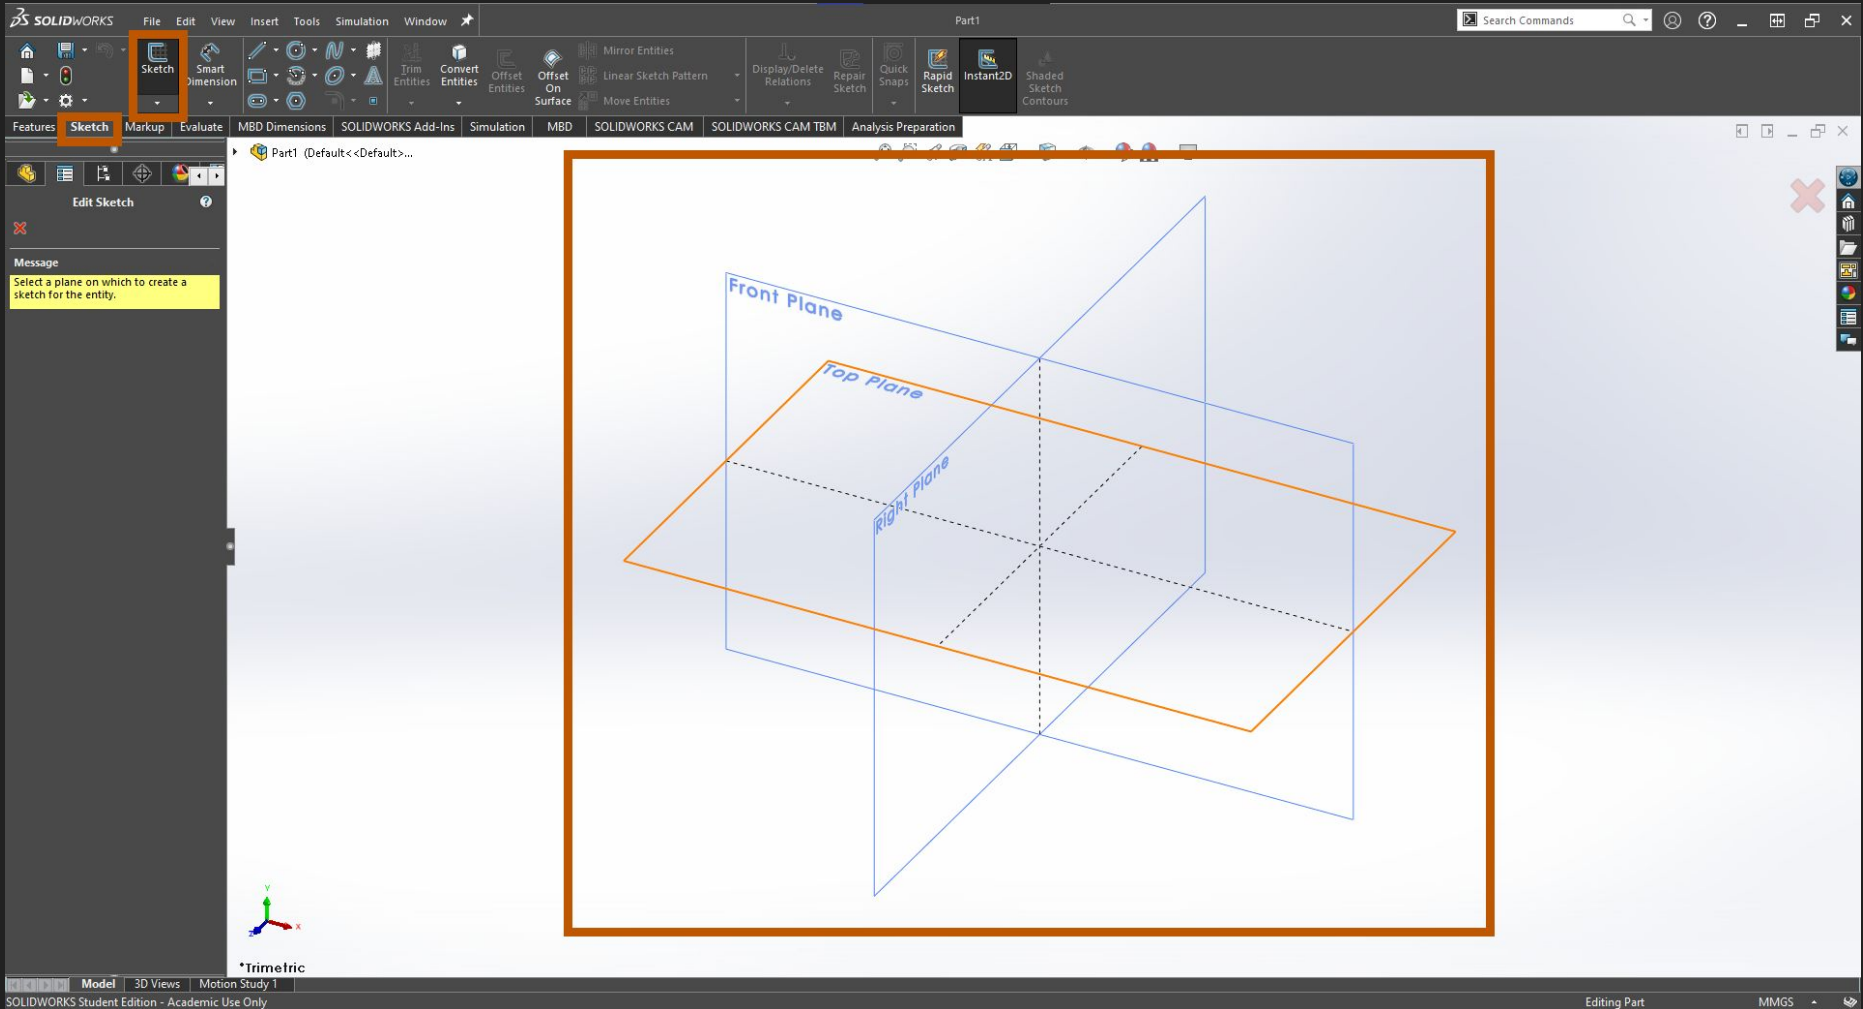

DEMO: How Does It Work

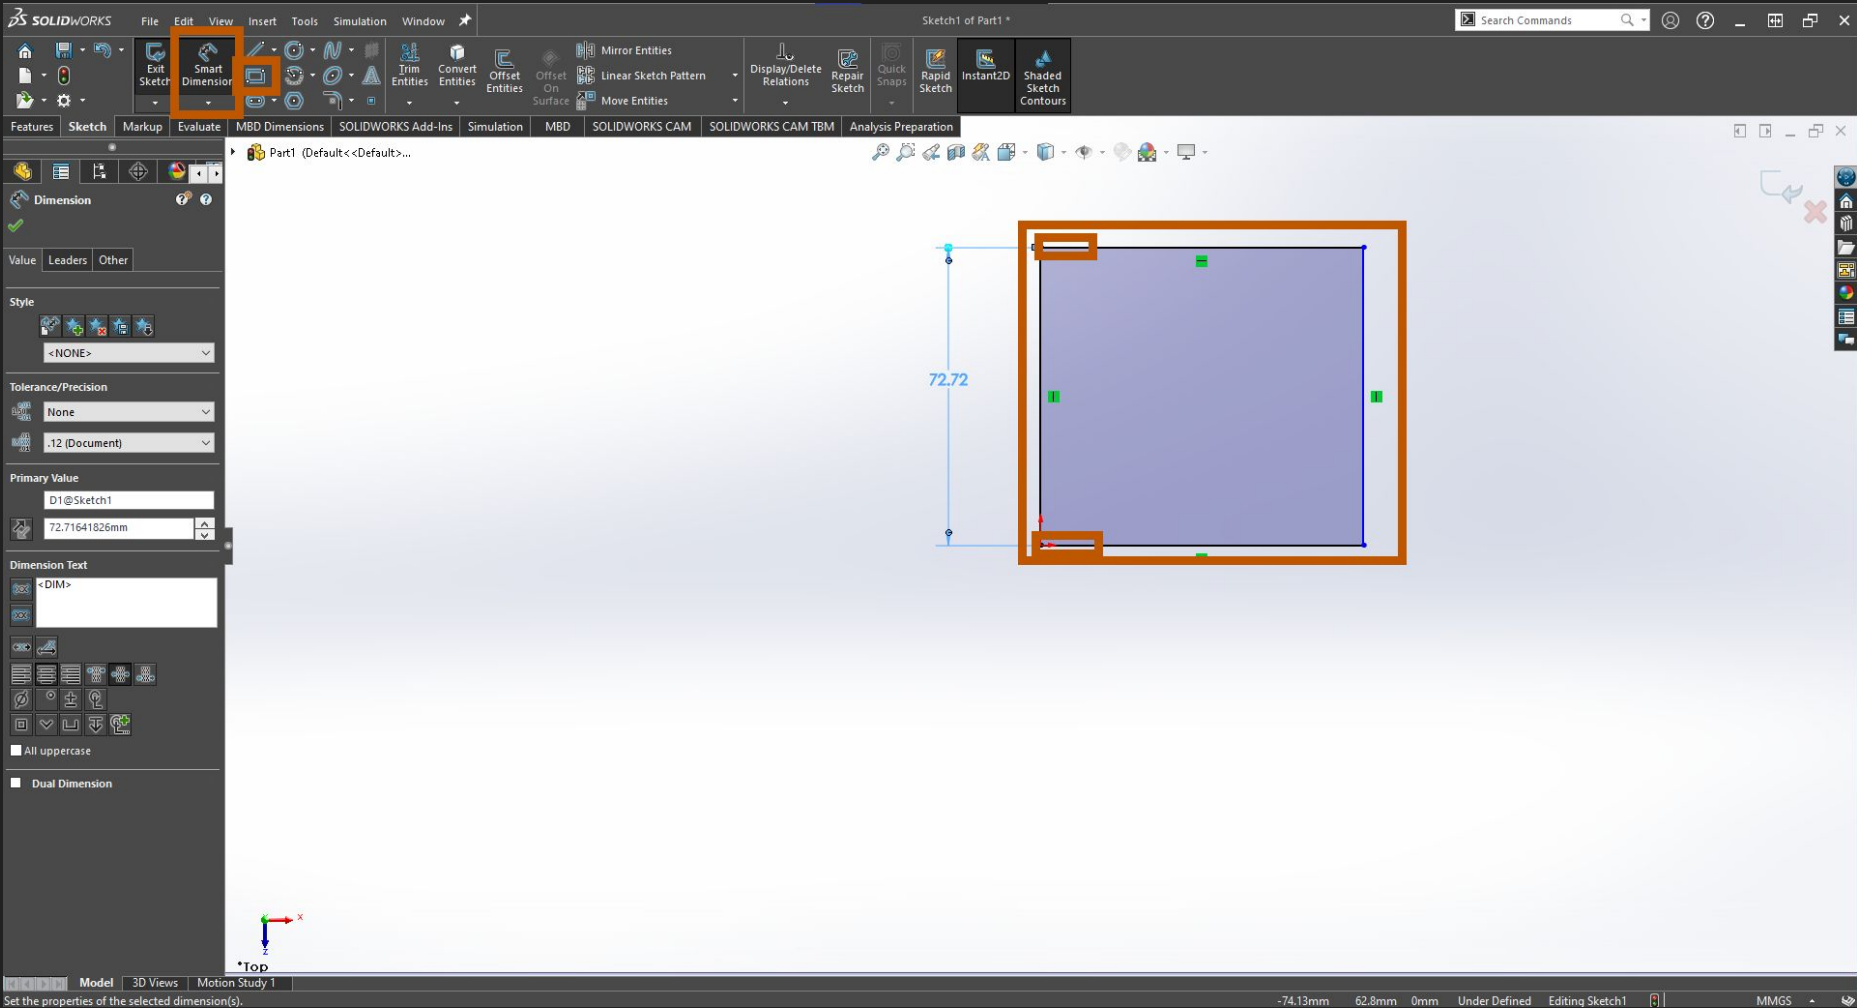

Super quick demo just to show off the essential tools

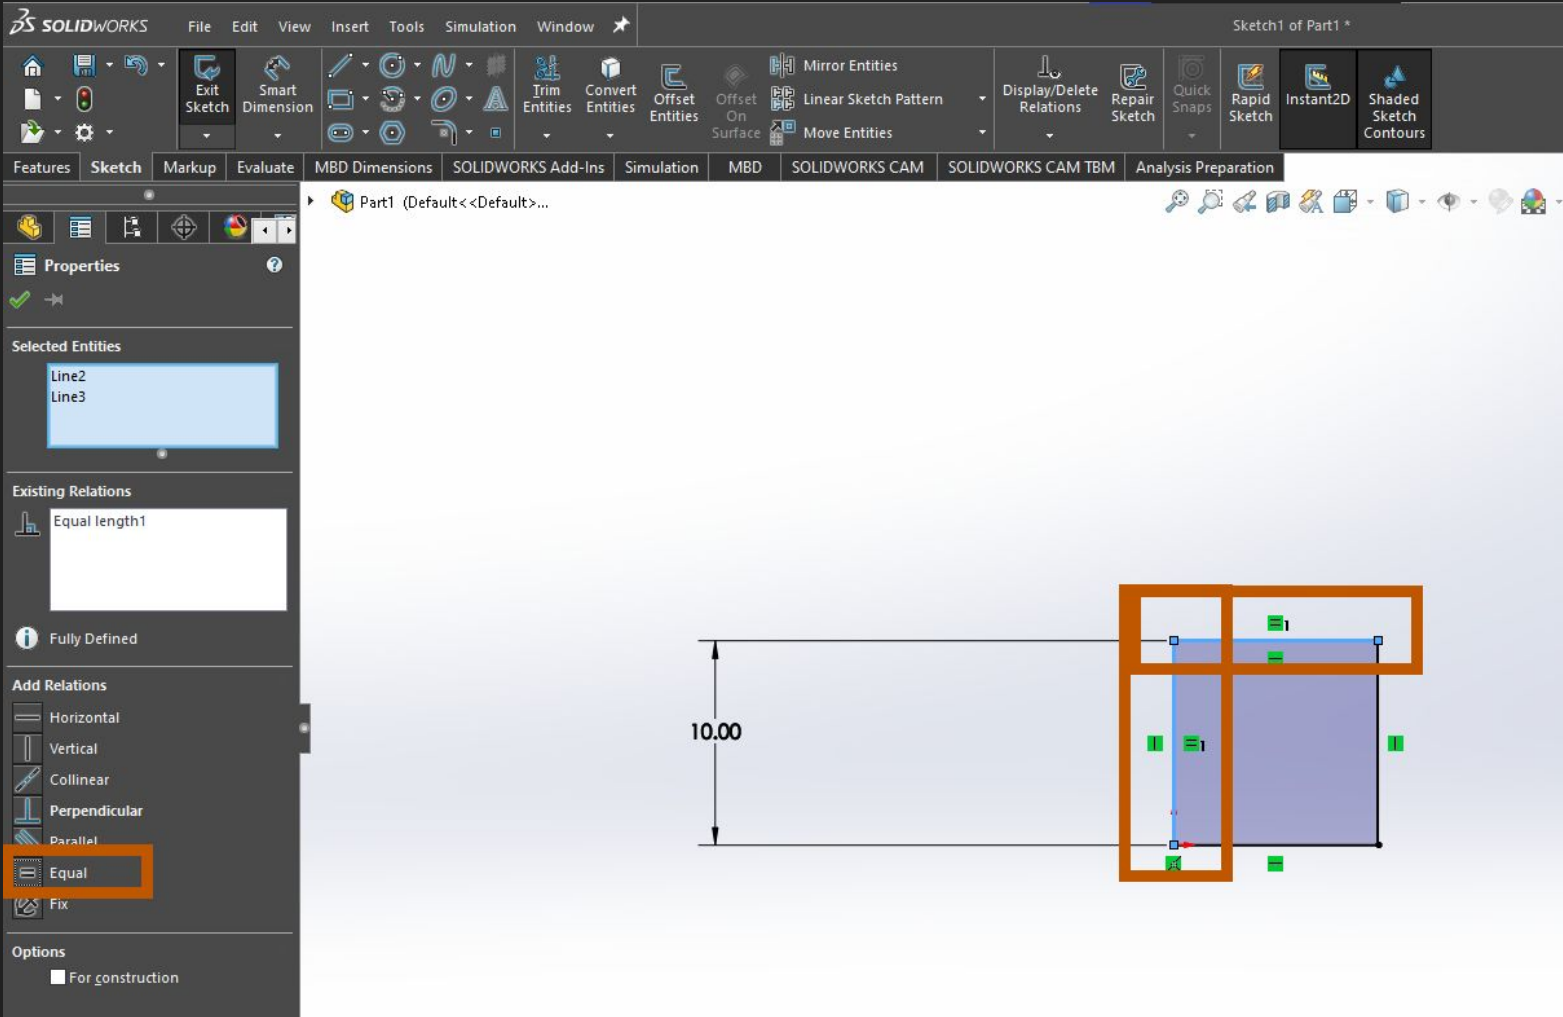

Clicks highlighted in orange

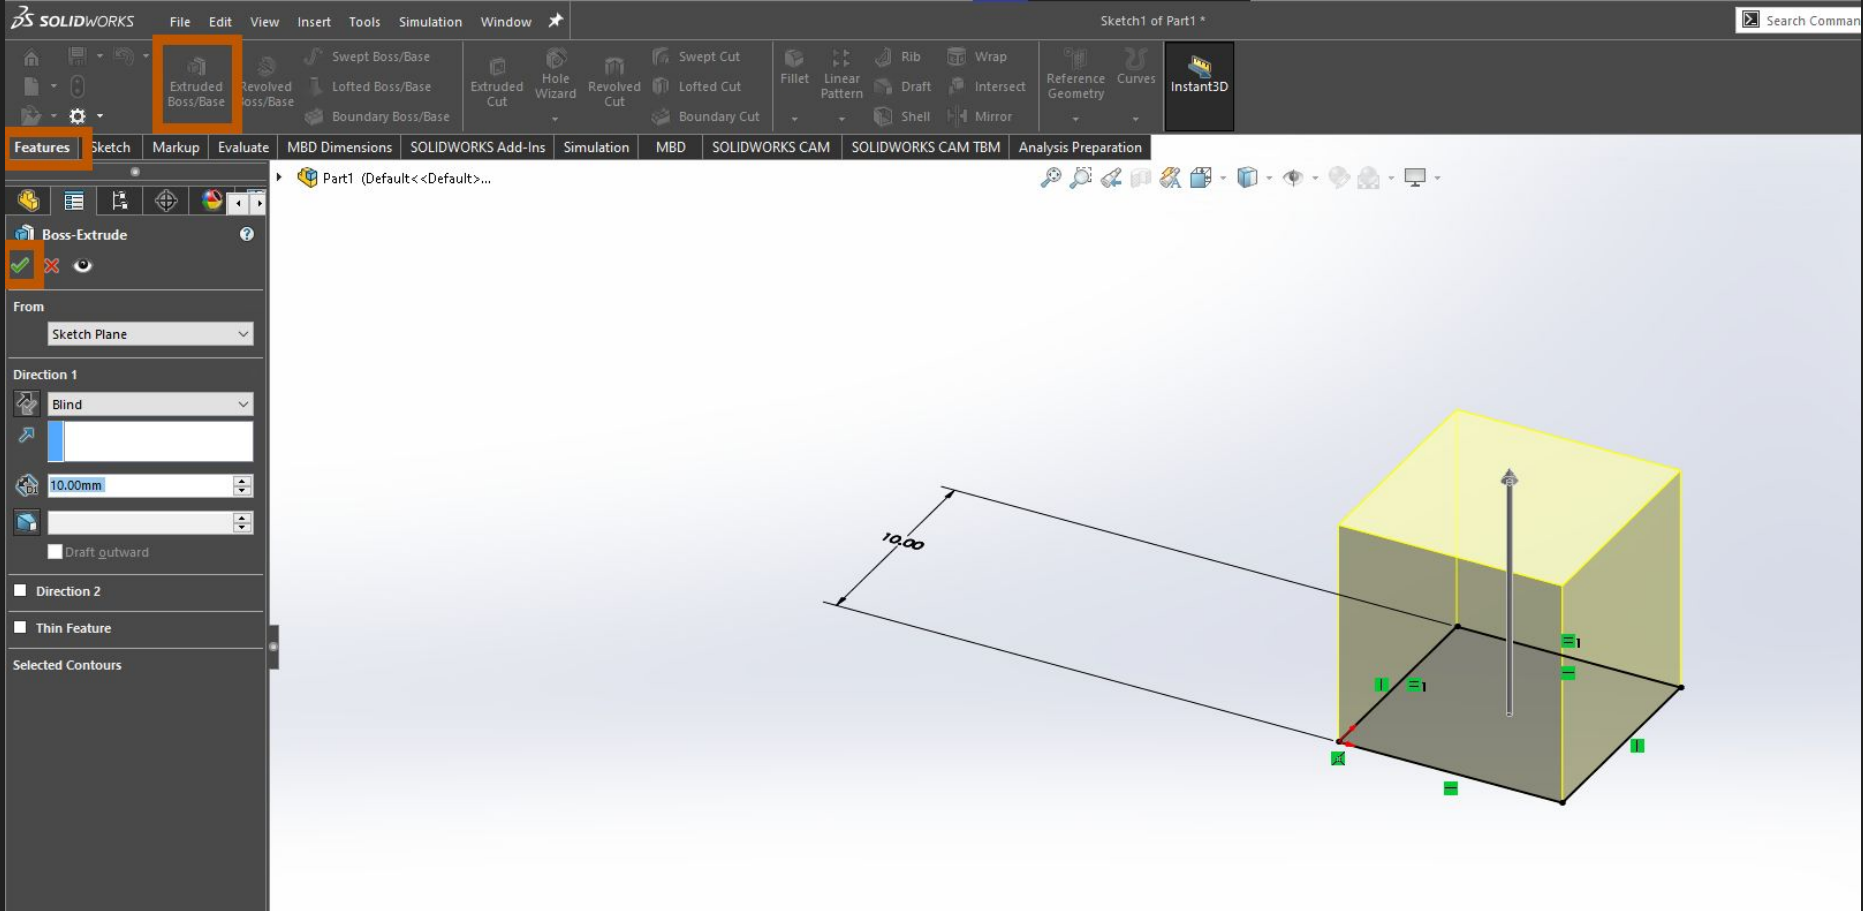

Making:

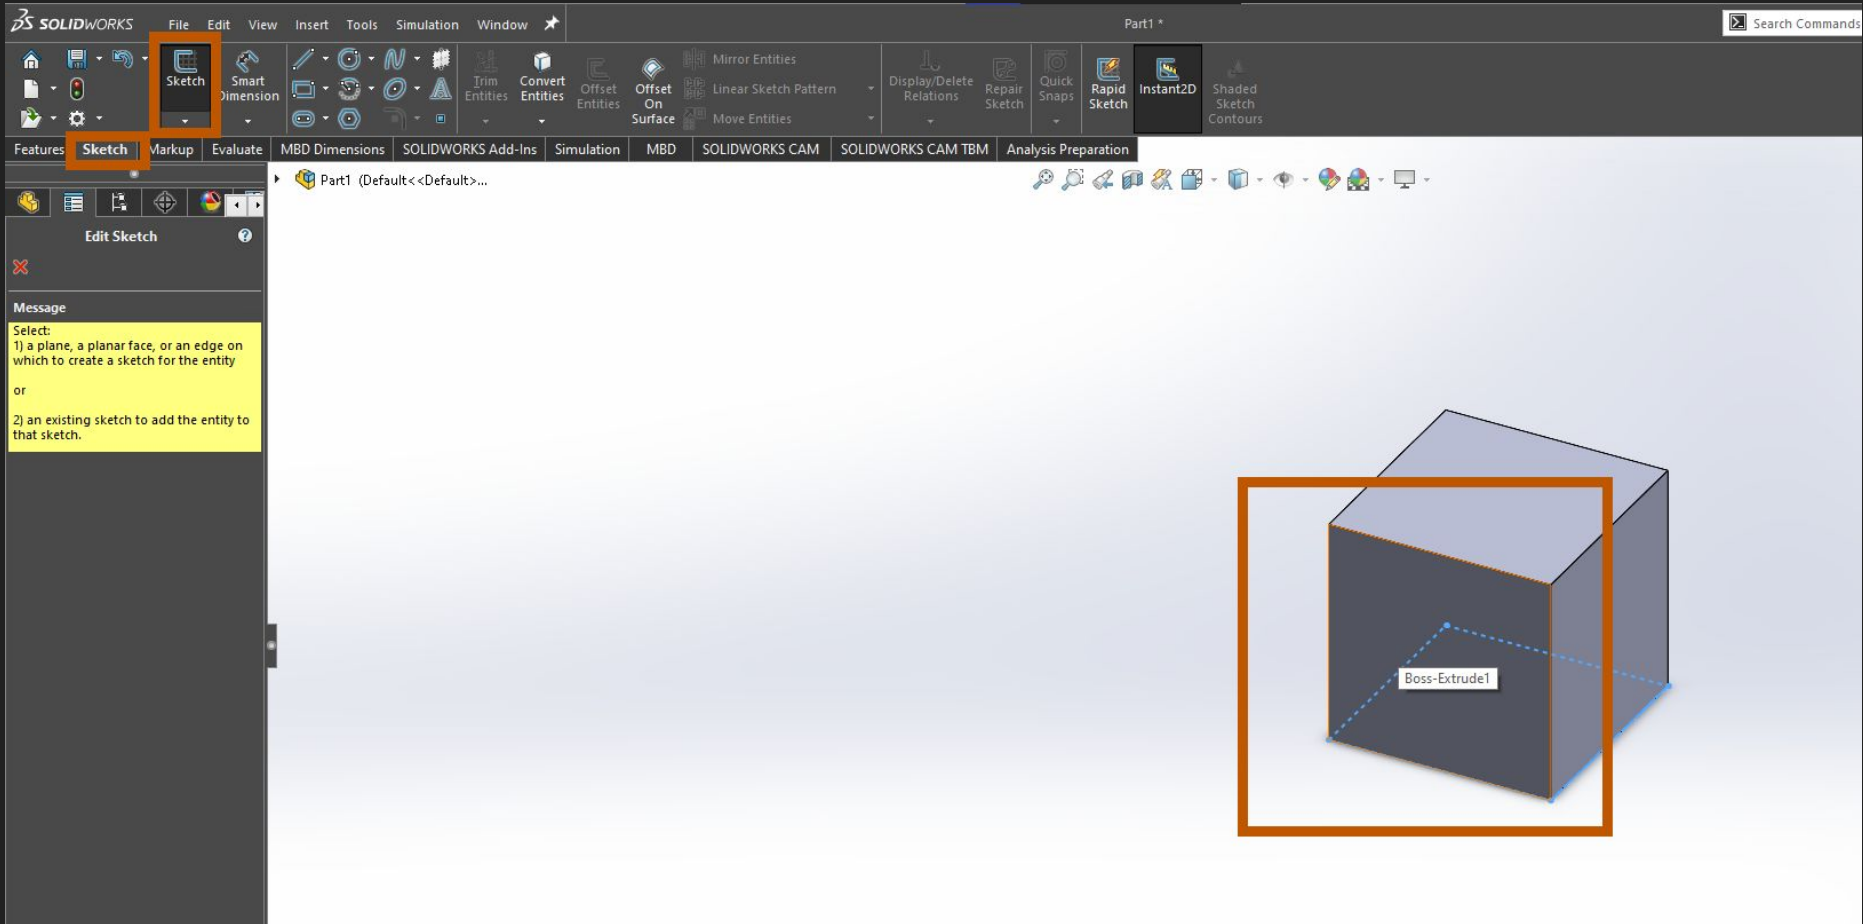

- > simple cube
- > with a hole in it
- > with chamfers

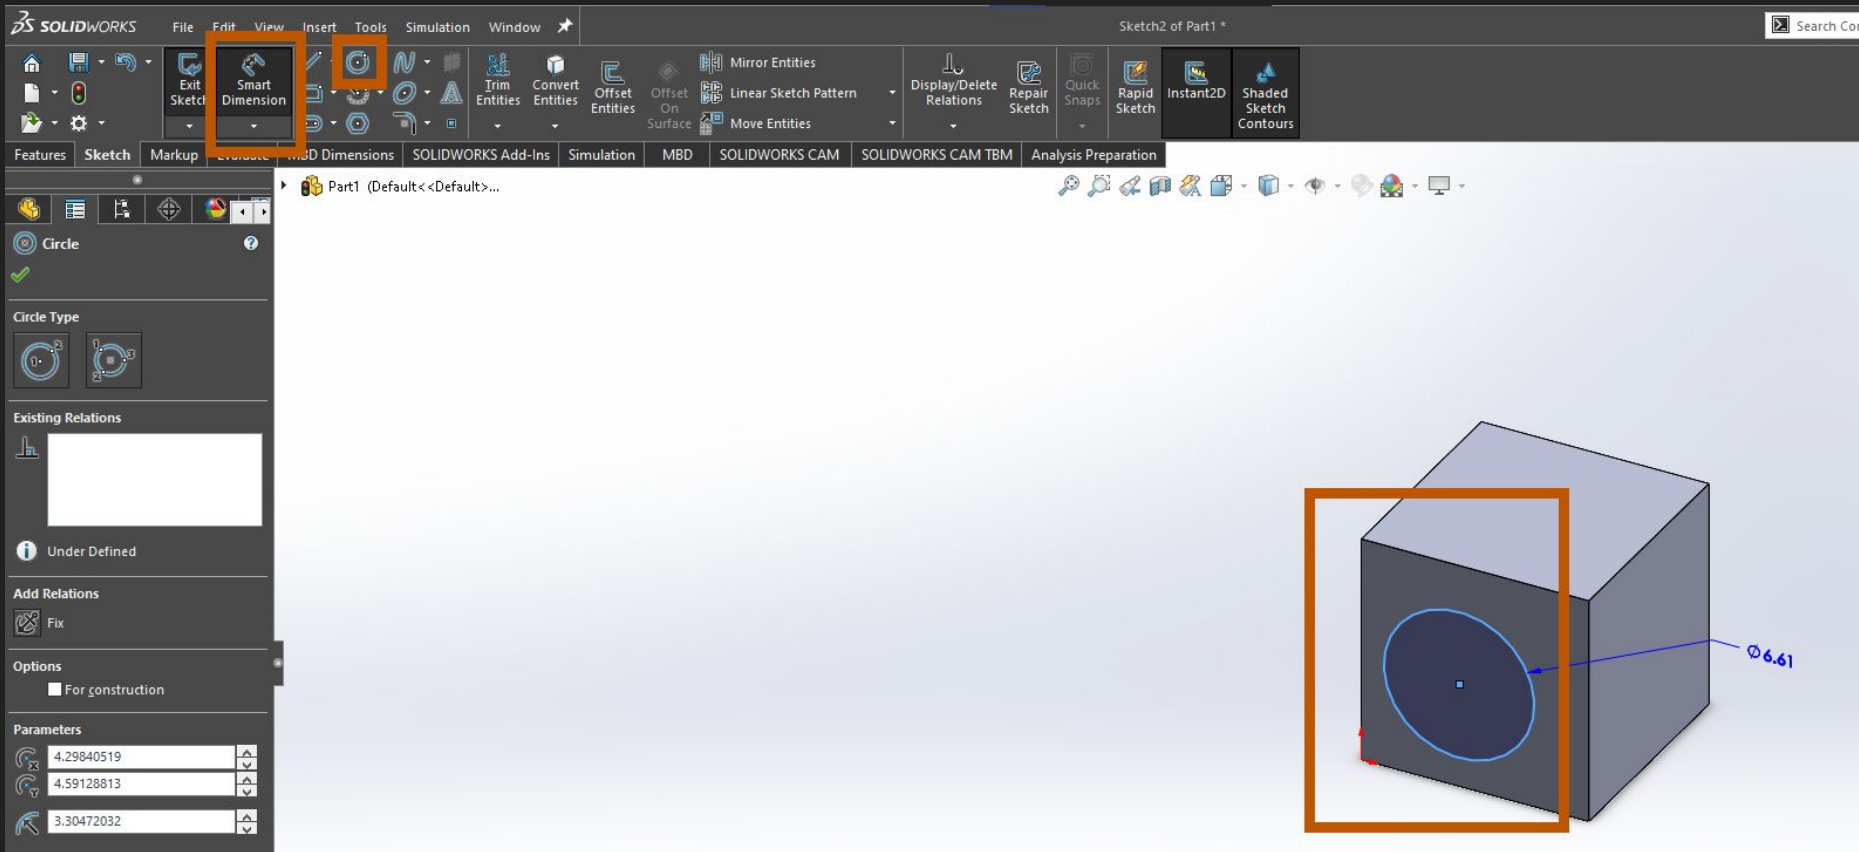

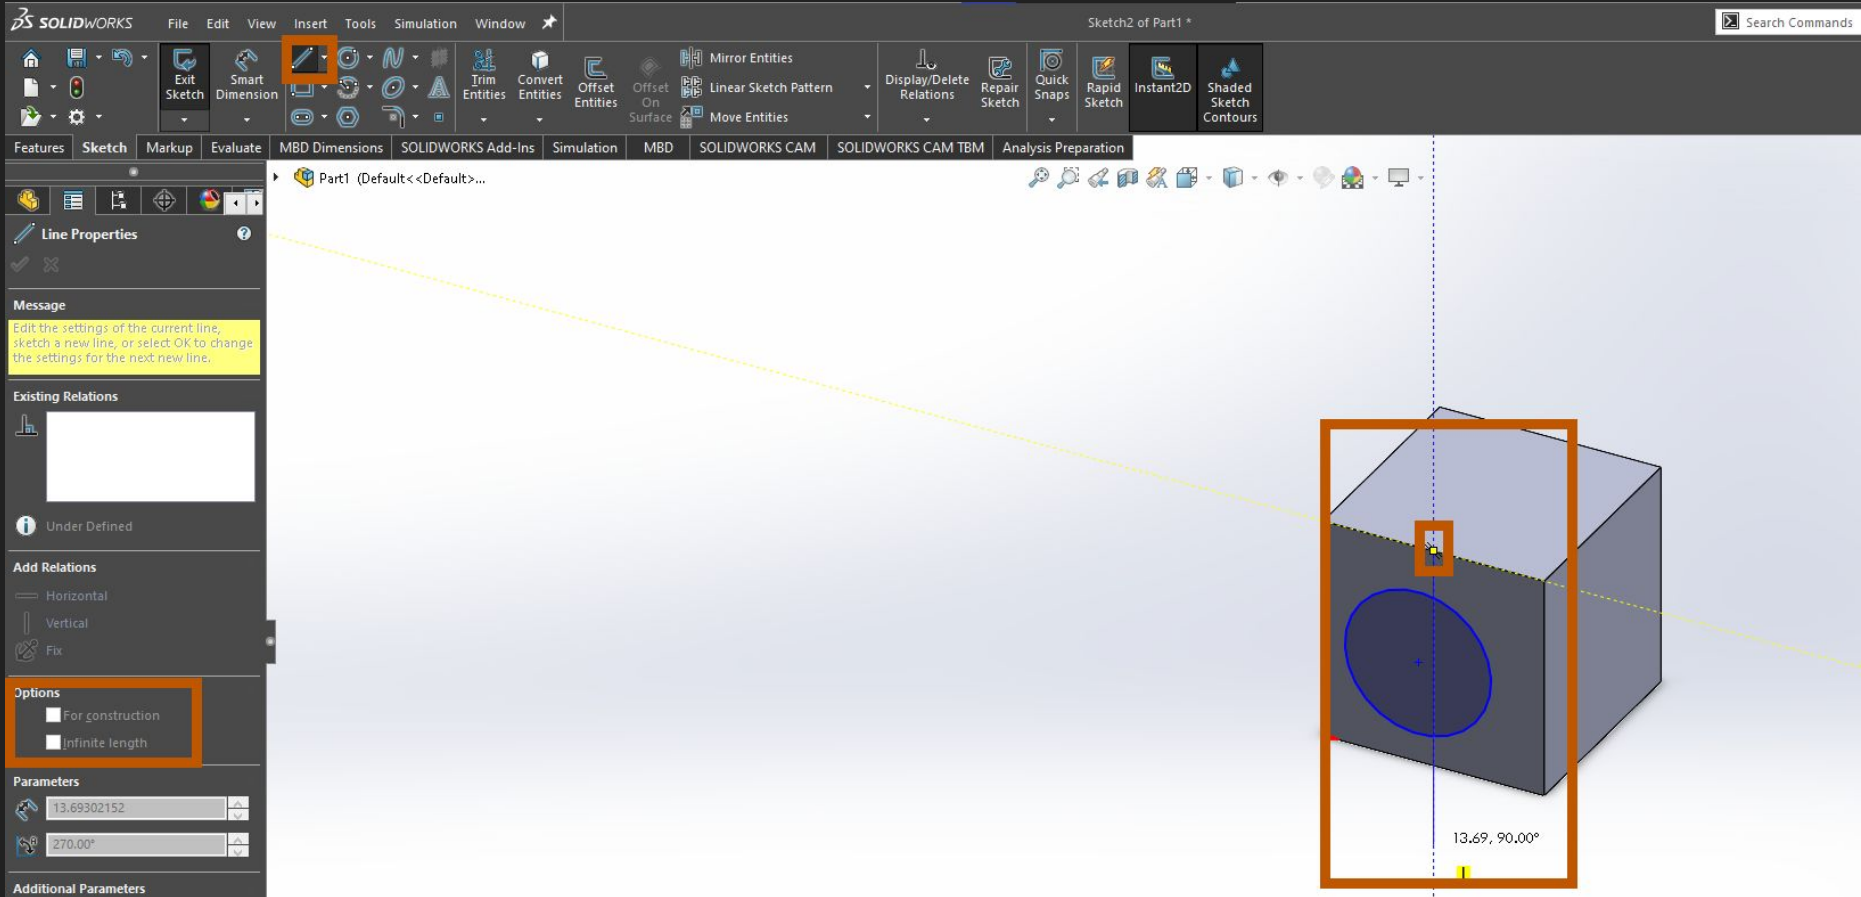

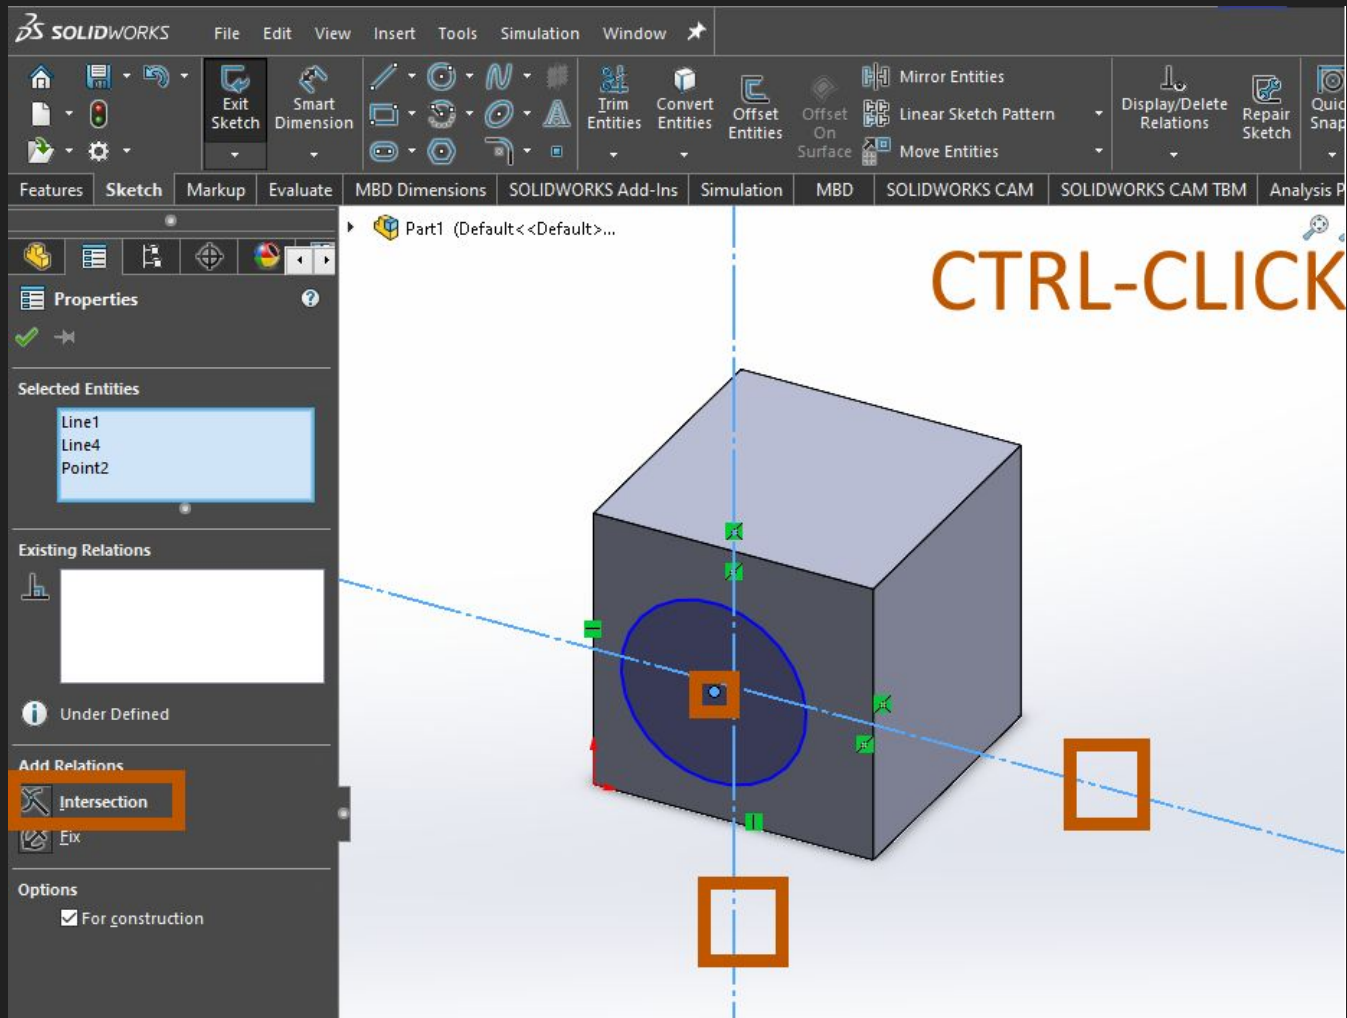

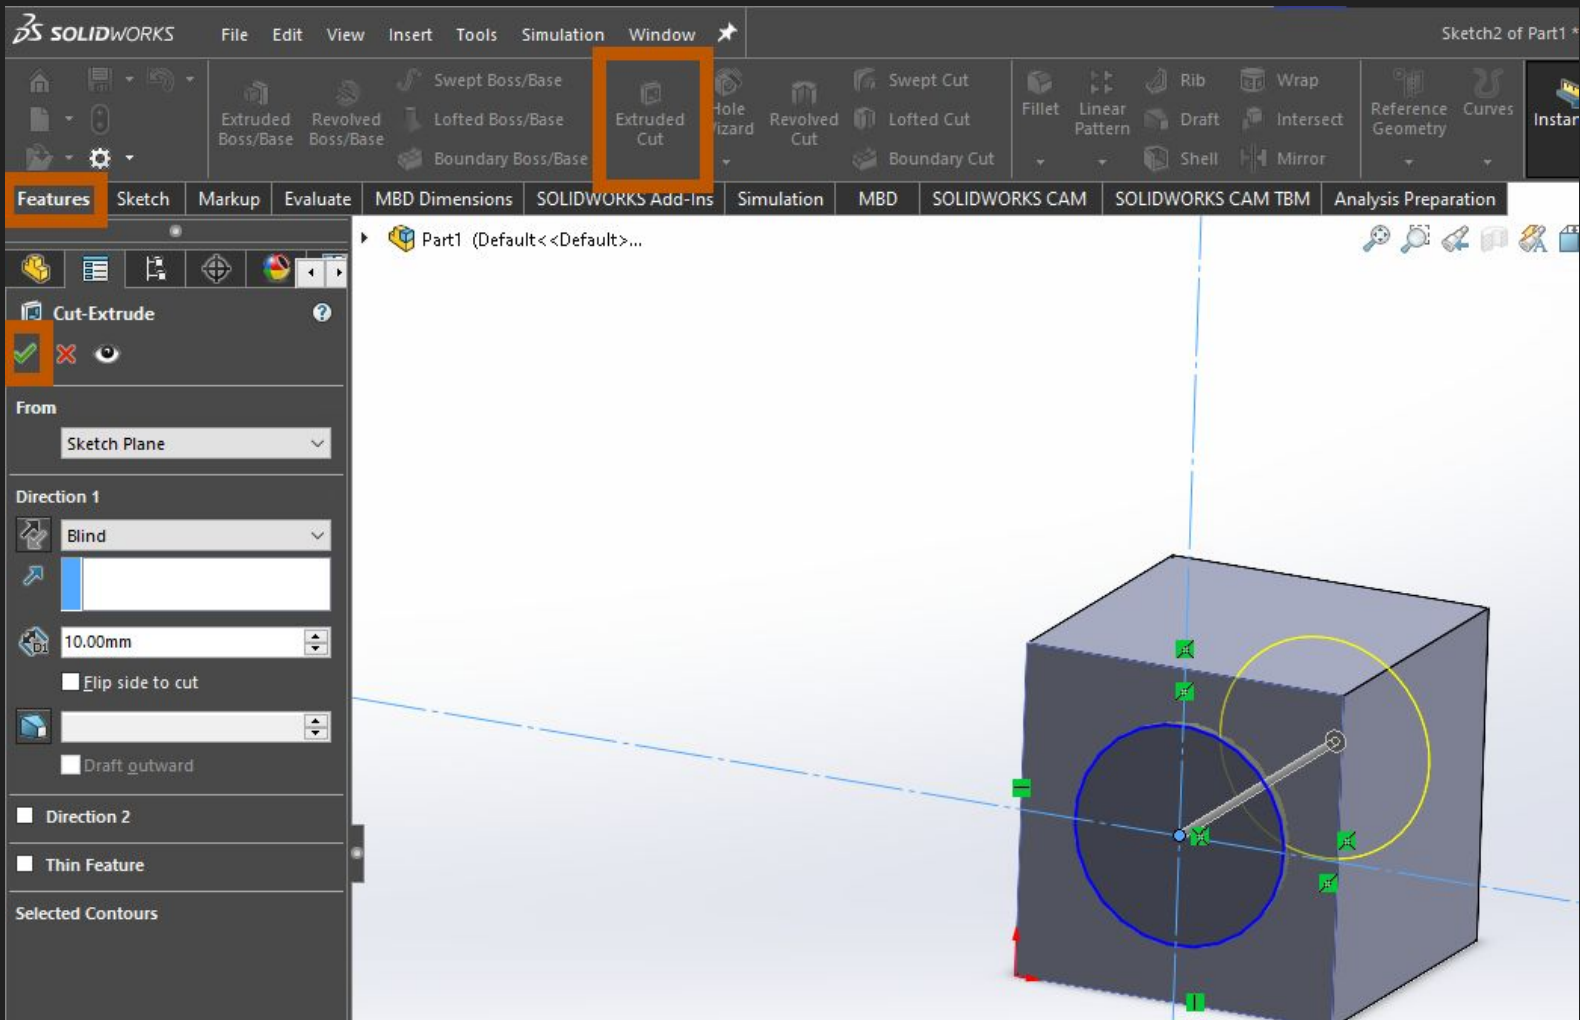

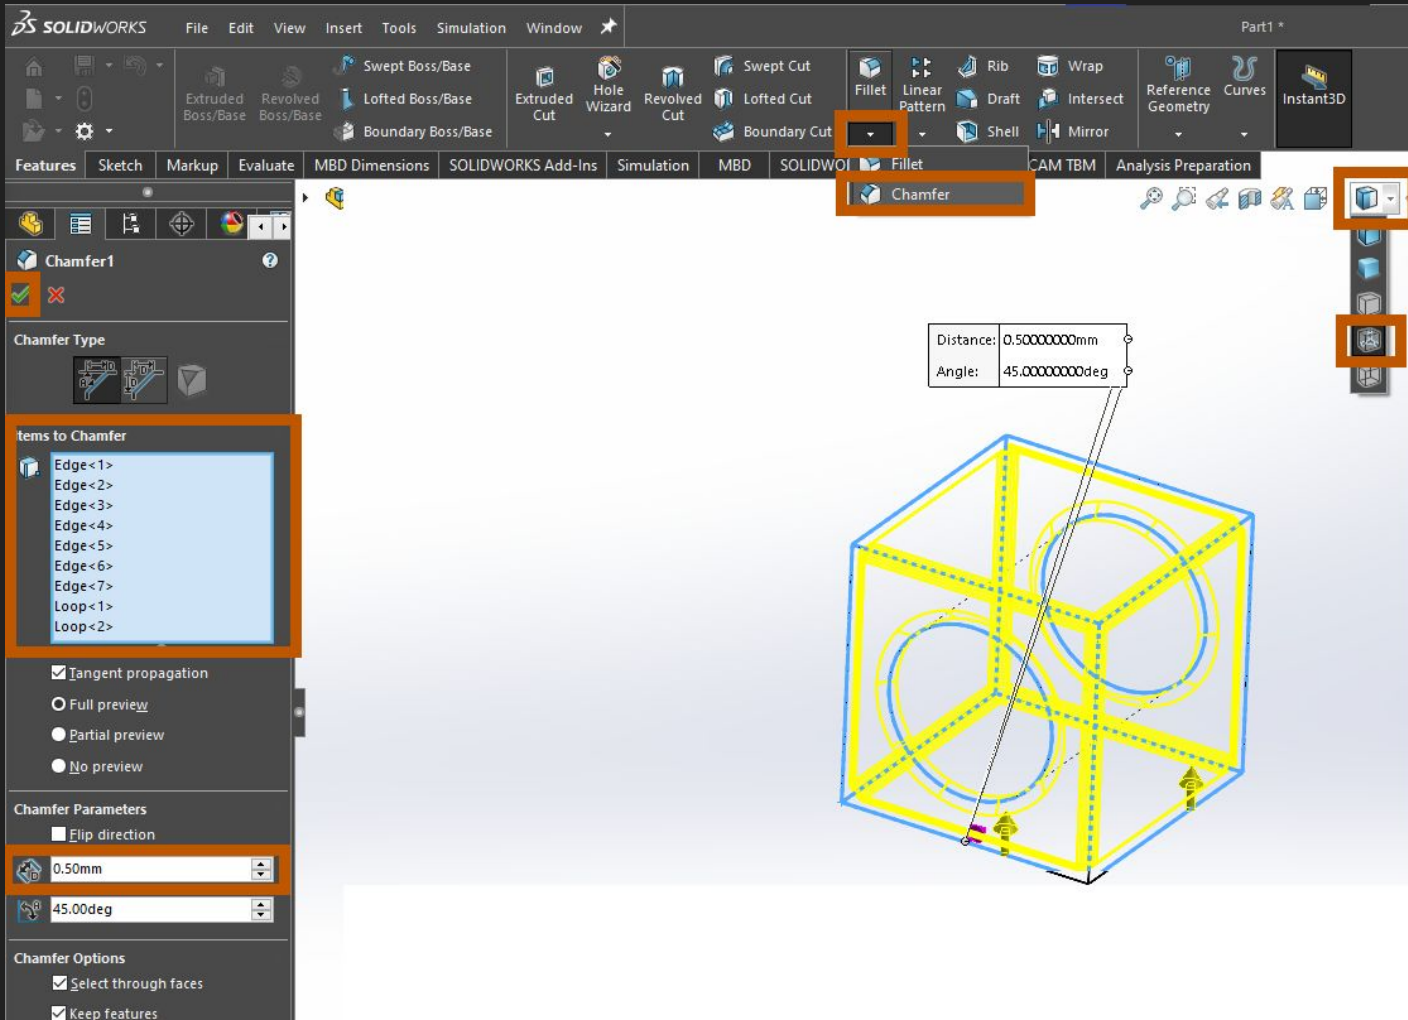

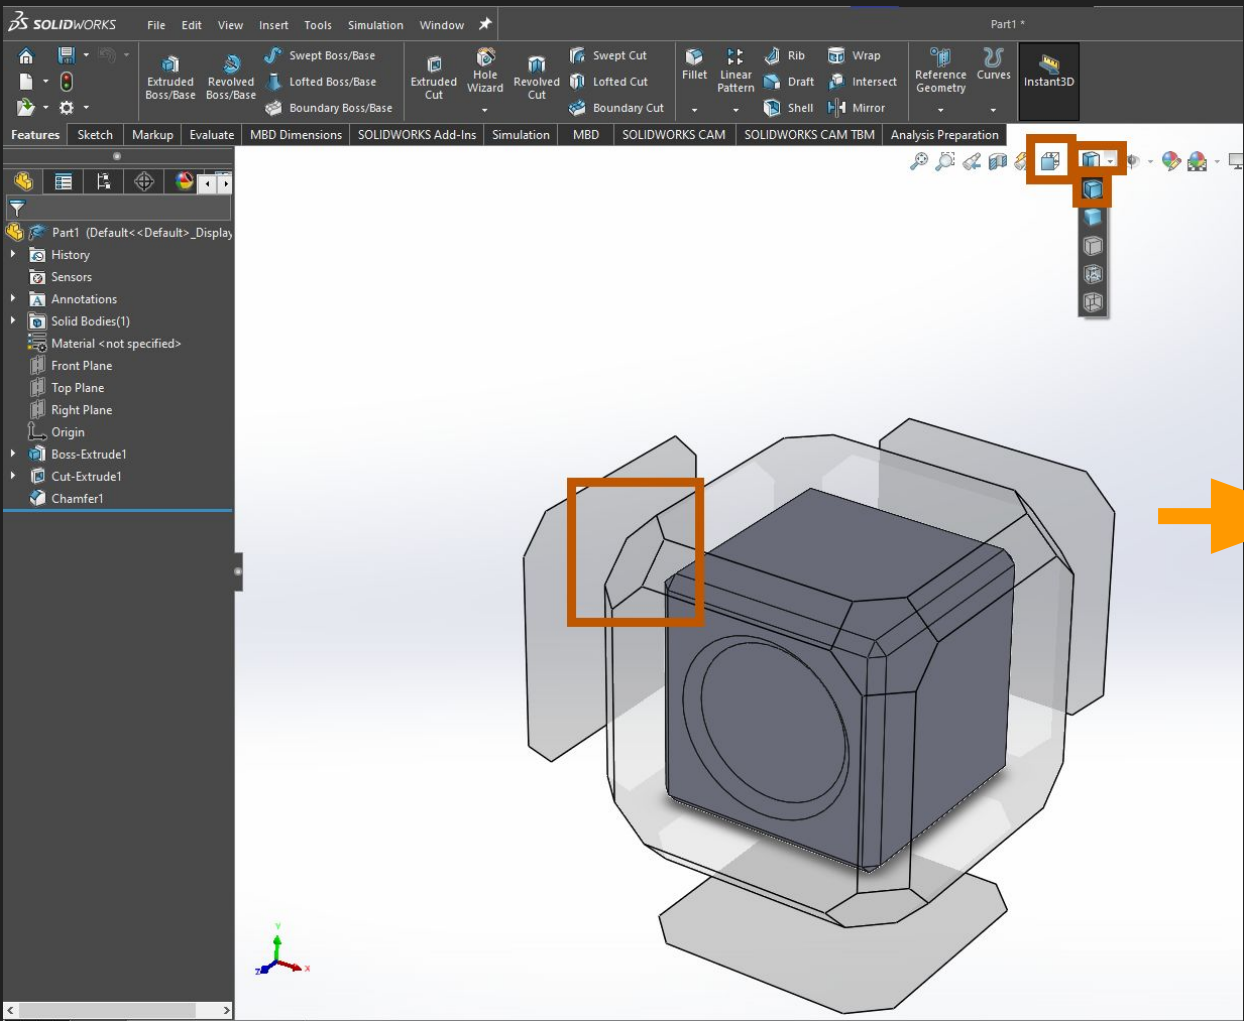

DEMO: Motor Mount

Now, something similar but practical

Clicks highlighted in orange

Making:

- > Mount shape
- > Hole to fit motor dimensions
- > Mounting and fixtures

What Motor?

<https://www.pololu.com/category/60/micro-metal-gearmotors>

> <https://www.pololu.com/product/3037/resources>

Pololu is great, you can get STEP models and everything from them

BUT

Usually life's not that easy, so we'll do this from the sheet

Gear ratio	L
1000:1	12.5 mm [0.49 in]
All others	9 mm [0.35 in]

DETAIL A
SCALE 5 : 1

1. To get the specified scale, select 100% in print settings.
2. These dimensions apply to all micro metal gearmotors that are not labeled "HPCB" (i.e. all ones with precious metal brushes).

<http://www.pololu.com/category/60>

Name: Micro Metal Gearmotors with precious metal brushes:
low-power, medium-power (MP), and high-power (HP)

Drawing date:

6 August 2015

Unit: mm (inches)
